

Report on the main results of the surveillance under article 17 for annex I habitat types (Annex D)

CODE: 5330

NAME: Thermo-Mediterranean and pre-desert scrub

1. National Level

1.1 Maps

1.1.1 Distribution Map	Yes
1.1.2 Distribution Method	Estimate based on partial data with some extrapolation and/or modelling (2)
1.1.3 Year or period	2006-2012
1.1.4 Additional map	No
1.1.5 Range Map	Yes

2. Biogeographical Or Marine Level

2.1 Biogeographical Region

2.2 Published

Mediterranean (MED)

2.3 Range of the habitat type in the biogeographical region or marine region

2.3.1 Surface area - Range (km ²)	3206
2.3.2 Range method used	Estimate based on partial data with some extrapolation and/or modelling (2)
2.3.3 Short-term trend period	2001-2012
2.3.4 Short-term trend direction	increase (+)
2.3.5 Short-term trend magnitude	min max
2.3.6 Long-term trend period	N/A
2.3.7 Long-term trend direction	min max
2.3.8 Long-term trend magnitude	area (km ²) operator unknown method
2.3.9 Favourable reference range	approximately equal to (≈) No
2.3.10 Reason for change	Improved knowledge/more accurate data Use of different method

2.4 Area covered by Habitat

2.4.1 Surface area (km ²)	301,04
2.4.2 Year or period	2000-2012
2.4.3 Method used	Estimate based on partial data with some extrapolation and/or modelling (2)
2.4.4 Short-term trend period	2001-2012
2.4.5 Short-term trend direction	increase (+)
2.4.6 Short-term trend magnitude	min max
2.4.7 Short term trend method used	Estimate based on partial data with some extrapolation and/or modelling (2)
2.4.8 Long-term trend period	N/A
2.4.9 Long-term trend direction	min max
2.4.10 Long-term trend magnitude	N/A
2.4.11 Long term trend method used	area (km) operator unknown method
2.4.12 Favourable reference area	approximately equal to (≈) No
2.4.13 Reason for change	Improved knowledge/more accurate data Use of different method

2.5 Main Pressures

Report on the main results of the surveillance under article 17 for annex I habitat types (Annex D)

Pressure	ranking	pollution qualifier(s)
grazing (A04)	low importance (L)	N/A
Roads, paths and railroads (D01)	low importance (L)	N/A
Urbanised areas, human habitation (E01)	low importance (L)	N/A
Hunting and collection of wild animals (terrestrial) (F03)	low importance (L)	N/A
Outdoor sports and leisure activities, recreational activities (G01)	low importance (L)	N/A
invasive non-native species (I01)	low importance (L)	N/A

2.5.1 Method used – pressures mainly based on expert judgement and other data (2)

2.6 Main Threats

Threat	ranking	pollution qualifier(s)
grazing (A04)	low importance (L)	N/A
Roads, paths and railroads (D01)	low importance (L)	N/A
Urbanised areas, human habitation (E01)	low importance (L)	N/A
Structures, buildings in the landscape (E04)	low importance (L)	N/A
Hunting and collection of wild animals (terrestrial) (F03)	low importance (L)	N/A
Outdoor sports and leisure activities, recreational activities (G01)	low importance (L)	N/A
invasive non-native species (I01)	low importance (L)	N/A

2.6.1 Method used – threats expert opinion (1)

2.7 Complementary Information

2.7.1 Species

Allium gomphrenoides

Anagallis arvensis

Arisarum vulgare

Asphodelus ramosus

Avena barbata

Brachypodium distachyon

Brachypodium retusum

Calicotome villosa

Cistus creticus

Thymbra capitata (syn: Coridothymus capitatus)

Dactylis glomerata

Daphne gnidioides

Euphorbia acanthothamnos

Euphorbia dendroides

Galium capitatum

Genista acanthoclada

Genista fasselata

Helichrysum stoechas subsp. barrelieri (syn: Helichrysum conglobatum)

Report on the main results of the surveillance under article 17 for annex I habitat types (Annex D)

Helichrysum orientale

Hypochaeris achyrophorus

Lagoecia cuminoides

Leontodon tuberosus

Linum strictum

Lotus ornithopodioides

Medicago coronata

Ononis reclinata

Origanum onites

Phagnalon rupestre subsp. *graecum* (syn: *Phagnalon graecum*)

Phlomis fruticosa

Piptatherum coerulescens

Pistacia lentiscus

Prasium majus

Sarcopoterium spinosum

Trifolium campestre

Trifolium scabrum

Drimia maritima (syn: *Urginea maritima*)

Urospermum picroides

Valantia hispida

2.7.2 Species method used

Typical species were determined on the basis of a vegetation database, comprised of about 22000 sampling plots. First, a list of possible typical species was determined per habitat type, selecting the ones presenting a high fidelity value to the habitat types according the algorithm of Tsiripidis et al. (2009) and the phi coefficient value (Chytrý et al. 2002). Then typical species per habitat type were selected from the above-mentioned lists by expert judgment and using as criteria species niche breadth, their ability to comprise indicators of habitat types' conservation status and their function as keystone species. The nomenclature of the typical species follows Dimopoulos et al.

(2013).References Chytrý, M., Tichý , L., Holt, J. & Botta-Duká t, J. 2002.

Determination of diagnostic species with statistical fidelity measures. Journal of Vegetation Science 13: 79–90. Englera 31: 1-367. Tsiripidis, I., Bergmeier, E., Fotiadis, G. & Dimopoulos, P. 2009. A new algorithm for the determination of differential taxa. Journal of Vegetation Science 20: 233-240.

2.7.3 Justification of % - thresholds for trends

2.7.4 Structure and functions - methods used

2.7.5 Other relevant information

Complete survey/Complete survey or a statistically robust estimate (3)

Report on the main results of the surveillance under article 17 for annex I habitat types (Annex D)

2.8 Conclusions (assessment of conservation status at end of reporting period)

2.8.1 Range	assessment Favourable (FV) qualifiers N/A
2.8.2 Area	assessment Favourable (FV) qualifiers N/A
2.8.3 Specific structures and functions (incl Species)	assessment Favourable (FV) qualifiers N/A
2.8.4 Future prospects	assessment Favourable (FV) qualifiers N/A
2.8.5 Overall assessment of Conservation Status	Favourable (FV)
2.8.5 Overall trend in Conservation Status	N/A

3. Natura 2000 coverage _conservation measures - Annex I habitat types on biogeographical level

3.1 Area covered by habitat

3.1.1 Surface area (km ²)	min 63	max 63
3.1.2 Method used	Complete survey/Complete survey or a statistically robust estimate (3)	
3.1.3. Trend of surface area	stable (0)	

3.2 Conversation Measures

3.2.1 Measure	3.2.2 Type	3.2.3 Ranking	3.2.4 Location	3.2.5 Broad Evaluation
Establish protected areas/sites (6.1)	Legal Administrative One-off	medium importance (M)	Inside	Maintain Long term
